Because SAP Business Network doesn't notify users when you change their assigned roles, we recommend telling users before you make changes.		
Choose the check box next to the user you want to delete, and click Delete .		
Note		
SAP Business Network does not maintain a record of deleted users.		
If you delete a user that has created customer catalogs, you need to log in with the user's username and password, save		

Description	Screenshot
valid copies of the customer catalogs to	
your computer or your back-end system,	
then delete the customer catalogs from the	
user' account before deleting the user.	
To facilitate deleting users with customer	
catalogs, you might want to track storage	
of customer catalogs outside of your SAP	
Business Network account and ensure you	
have a current record of login information	
for users with catalog permissions.	
Enter a vegenerate amoil address first and	
Linter a user name, email address, first and	
number for the user	
Note	
When users create transaction audit	
reports or submit documents such as	
invoices, order confirmations, and ship	
notices, SAP Business Network captures	
the user's first and last name, so ensure	
that these values are correct.	

Description	Screenshot
In the Role Assignment section, choose one or more roles for the user.	
Click Save .
