SmartCare Platform

At Stryker our SmartCare Platform offers a range of transformative services and capabilities in a single, integrated AI-powered platform.

Leveraging always-aware ambient sensors and an AI-enabled command center our SmartCare Platform gives care teams the opportunity to provide proactive and timely care, help prevent adverse events before they occur, help reduce burdensome administrative tasks from clinicians and provide more time for compassionate care with a human touch. Some of the most powerful capabilities include:

Virtual care support
- Virtual nursing support
- Virtual monitoring
- Medication adherence monitoring
- Family and friend video chat

Clinical ambient monitoring
- Hand hygiene compliance
- PPE guideline adherence
- Injury prevention protocols
- Patient detection

Operational ambient monitoring
- Real-time protocol adherence
- Ambient ADL capture
- Autonomous clock in/out
- Room sanitation monitoring
