

Prime Series Stretcher

Mobile. Ergonomic. Configurable.

Our Prime Series Stretchers are designed to help reduce physical strain on clinicians, enhance patient comfort and help reduce drive hospital efficiency. Transporting heavier patients is now easier with Stryker's advanced mobility; while electric functionality gives patients the independence to adjust themselves without calling for caregiver assistance. Fully equipped and configurable, our Prime Series Stretchers allows you to create the ideal solution to meet your specific needs.

Advanced Stretcher mobility:

Zoom with Motorised Drive
Virtually eliminates manual pushing.

Big Wheel Reduces start-up push force and steering.

Electric-powered lift eliminates manual pumping, allowing for quick patient access and caregiver safety. Simply touch the hydraulic pedal to raise the litter.

Life Assist Backrest uses the patient's weight to raise the head of the stretcher while the drop seat design helps reduce boosting. Also available as a fully electric option.

Recovery chair position helps eliminate the need for unnecessary transfers by providing a comfortable seated position.

Patient controls The patient has control of their own comfort with the staggered control panels on the Glideaway siderails.

IsoFlex SE Gel Support Surface¹ offers pressure redistribution and comfort as a component to aid in the treatment and prevention of pressure injuries.

Power-washable² design with 318 kg safe working load.

¹Recommended to be implemented in combination with clinical evaluation of risk factors and skin assessments made by health care professional
²1105 and 1115 models only

Prime Series Stretcher

Standard features

- 318 kg weight capacity
- Less than 54 cm low height
- Litter-mounted oxygen bottle holder
