

ASC Observer

Unique challenges

Tailored solutions

August 2020

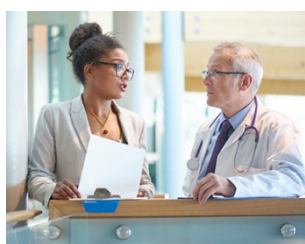

Success starts with understanding

Before we can contribute to your success, we have to understand your needs. That's why, at Stryker, listening is always our first step. Because every ASC is different, and everyone has unique plans for the future of their practice—but whatever the case, we've got you covered. Our dedicated ASC team can offer an unmatched product portfolio, flexible financial options and valuable insights into your local customer base. But before we talk any more about ourselves, we want to know all about you.

[LET'S TALK ABOUT YOUR ASC](#)

More than just products — **solutions**

Our dedicated team can help maximize your ASC's clinical, financial and operational outcomes by providing tailored solutions that will match your needs—both now and in the future. Our high-quality products cater to your ASC's specialties, our customized financial options optimize cash flow and we offer personal support for our entire portfolio.

When you partner with Stryker we'll help you plan for long-term success. Our engagement platforms can help to improve care coordination and patient experiences, and use data analytics to measure your performance against your own organizational objectives.

Mako SmartRobotics™ in an ASC setting

Join Dr. Scott Schoifet on August 26th for a featured workshop as part of the Becker's Healthcare Orthopedics + ASC Virtual Forum. His 30-year career in orthopaedic surgery began with inpatient total joint replacement, and grew to include building his own ASC. Learn about how his practice has flourished and his experience with Mako SmartRobotics at the "Mako in an ASC Setting" webinar.
