

EasyFuse™

Dynamic compression system

When you are unwilling to compromise,
the choice is easy: EasyFuse™

Dynamic compression system

EasyFuse is a comprehensive super-elastic nitinol staple system designed to provide fast and easy fixation in high demand applications of the foot and ankle. A variety of implant configurations are offered in compact, sterile implant packs along with a universal, single use instruments pack.

Designed **strong**

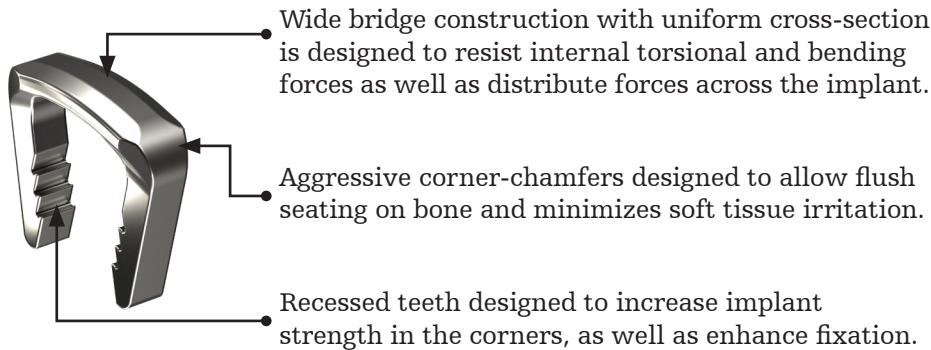

Extra wide staple bridge designed to distribute forces and provide consistent implant strength

Designed **efficient**

Universal, sterile packed instrumentation decreases surgical complexity and reduces OR material waste

Designed **easy**

Intuitively designed inserter provides confident deployment of implant while also allowing quick and easy implant reloading if desired
