# Reprocessed **EP cables**

Reprocessed EP cables are a set of insulated wires, wrapped in a protective coating, with unique connectors on each end.

**Now available:** reprocessed nGen ablation cable, reprocessed DiamondTemp ablation cable and Orion 78in cable.

## Reduce uncertainty

- Reduced questioning about which product is failing during the procedure
- Each product is 100% function tested<sup>1</sup> and reprocessing cycles are tracked
- In-house reprocessing can damage cables when equipment like Autoclaves are used<sup>2</sup>
- Our validated cleaning process aligns with OEM IFU recommendations ensuring cable performance<sup>3</sup>
- Barcode placed on each cable tracks every reprocessing cycle
- In-house reprocessing turns may not be tracked and faulty cables could be used

**99.97%**  
success rate<sup>4</sup>

### See below for the newest additions to our EP cable product offering.

Over the last two years, we've added 19 new cables. Please contact your SSS representative for our complete offering.
